

2026-2027 Fall Undergraduate Technical Elective Courses for Graduate Students

Dear all,

This semester, the following two undergraduate technical elective (TE) courses (with limited capacity) are available for graduate students.

1. IE455 An Introduction to Combinatorial Analysis by M. K. Tural (no prerequisite)
2. IE456 Network Routing by M. K. Tural (prerequisite-IE252)

The syllabi for these courses are available at METU Student Portal [View Program Course Details \(64\)](#)

Graduate students will NOT submit a preference form. Instead, please send an e-mail to **ie-tech@metu.edu.tr** indicating the IE4XX course(s) you would like to take (you may take both courses) before **Tuesday, September 22nd, 12:00 pm**.

The subject of your mail should be TEHELECGRAD_youridnumber. For example: TEHELECGRAD_1234567. Please note that e-mails with an incorrect subject line may be disregarded.

Due to the limited number of places available to graduate students, course assignments will be made on a first-come, first-served basis. Assignments will be announced on the <https://ie.metu.edu.tr/en/current-semester> on **Wednesday, September 23rd**.

Please make sure that you only apply for a course if you are certain that you are willing to take it if you are assigned to it and that the course has been approved by your advisor. We will closely monitor the registration process to ensure that all assigned students register properly.

We would like to remind you of the following requirements under the regulations governing graduate studies:

- Doctoral students are not normally allowed to take 4XX courses.
- A master's student may take a maximum of two IE4XX and non-departmental courses in total.

If you have any questions, please contact the TE Committee at ie-tech@metu.edu.tr.

Best,

Technical Elective Committee
